

**load capacity PT06-top**

**dimensions:** L/B/H= 103cm / 90cm / 70cm  
**dead weight [kg]:** 27,00

<b>immersion depth floating bodies</b>	<b><u>load capacity</u> (dead weight deducted)</b>	<b>notes</b>
<b>[cm]</b>	<b>[kg]</b>	
5,0	-11,0	
10,0	3,0	
15,0	25,0	
20,0	49,9	
25,0	78,0	
30,0	107,0	
35,0	138,0	<b>1/2 immersion depth of the float</b>
<b>40,0</b>	<b>169,0</b>	
<b>45,0</b>	<b>202,0</b>	
50,0	234,0	<b>20cm freeboard to the top of the float</b>

**Advices:**

- The load-capacities are always based on an evenly load distribution.
- For drive with the boat we recommend a max. immersion depth of the floating bodies of 45cm!  
(load capacity reserves for temporary overloads available)
